Introduction

The purpose of this document is to describe the features and operation of the PowerSquare 224 when used in-line with validated Xerox printers. It also provides information to be used when planning the installation of this solution.

About this Guide

This guide will provide the Analyst and the Customer with common PowerSquare 224 specifications and pre-installation tasks.

Contents

This section lists the contents of this guide:

- Introduction - provides information about the use of this guide.
- Product Overview - provides Performance Specifications and Installation Planning including Space, Electrical, Environmental requirements, Installation Time, and Operating Supplies.
- Xerox Nuvera 100/120/144/157 EA Production Systems and 200/288/314 EA Perfection Production System - provides information about Limitations, System Dependencies, and Configuration Guide.
- Xerox® iGen3 / iGen4 / iGen150 Press - provides information about Limitations, System Dependencies, Configuration, and Productivity.
- Xerox® Color 8250 Production Printer - provides information about Limitations, System Dependencies, Configuration, and Productivity.
- Xerox Color 800/1000 Press - provides information about Limitations, System Dependencies, Configuration, and Productivity.
- Xerox Color DocuColor 8080 Digital Color Press - provides information about Limitations, System Dependencies, Configuration, and Productivity.
- Xerox Dual-Mode Sheet Feeder (BSFEx) - provides information about Limitations, System Dependencies, Configuration, and Productivity.
- Customer Agreement - contains the Customer Agreement form.

Professional Support Services

Xerox offers a rich set of value-added services designed to help you plan, implement, and operate your solution, migrate and build your key applications, and analyze and redesign your workflow. Your local sales representative and analyst can show you how these billable services can make your business more effective.

Product Overview

The PowerSquare 224

The PowerSquare 224 is a complete booklet making solution for digital printers. It will produce stitched, SquareBack books up to 224 pages thick.

The PowerSquare 224 is available in three configurations: off-line, in-line, and dual mode. It connects to a wide range of digital printers, including both center- and side-registered systems. Optional accessories include a high capacity book stacker and a full-bleed trimmer for color documents. This model includes a larger online sheet size (365x500mm), an increased book thickness (10.4mm) and a higher average monthly production volume (50,000 books). The paper path through the machine has been enhanced to optimize performance with the high quality papers used in color digital print applications.

The machine also features a new dynamic auto-adjustment system that ensures quality performance regardless of book thickness, allowing uninterrupted running when streaming jobs, or when printing variable content documents that have different page-counts. The PowerSquare 224 produces a perfect stitch regardless of whether the book has 2 pages or 224 pages, without operator intervention.

The optional PowerSquare Book Stacker is available as an accessory to the PowerSquare 224. The PowerSquare Book Stacker has a capacity of 930mm, which means that it can run for up to an hour without operator intervention. The stacker accommodates different sized books without adjustment and can be unloaded on-the-run to provide uninterrupted production.

The PowerSquare Book Stacker

The optional Full Bleed Trimmer completes the booklet making process by trimming the top and bottom edge of the book. It provides a professional solution for full-bleed printed work.

The Full Bleed Trimmer

The PowerSquare 224, the PowerSquare Book Stacker, and the Full Bleed trimmer are designed and manufactured by Watkiss Automation (UK). In North America, C. P. Bourg Inc. markets the products to Xerox customers and provides nationwide sales and support.

Install Planning

This Solutions Planning Guide will help you prepare for the installation of the PowerSquare 224.

Device Configurations

The PowerSquare 224 components are:

- PowerSquare
- Connecting Bridge
- Bridge Covers
- PowerSquare Full Bleed Trimmer (option)
- PowerSquare Book Stacker (option)

Space Requirements

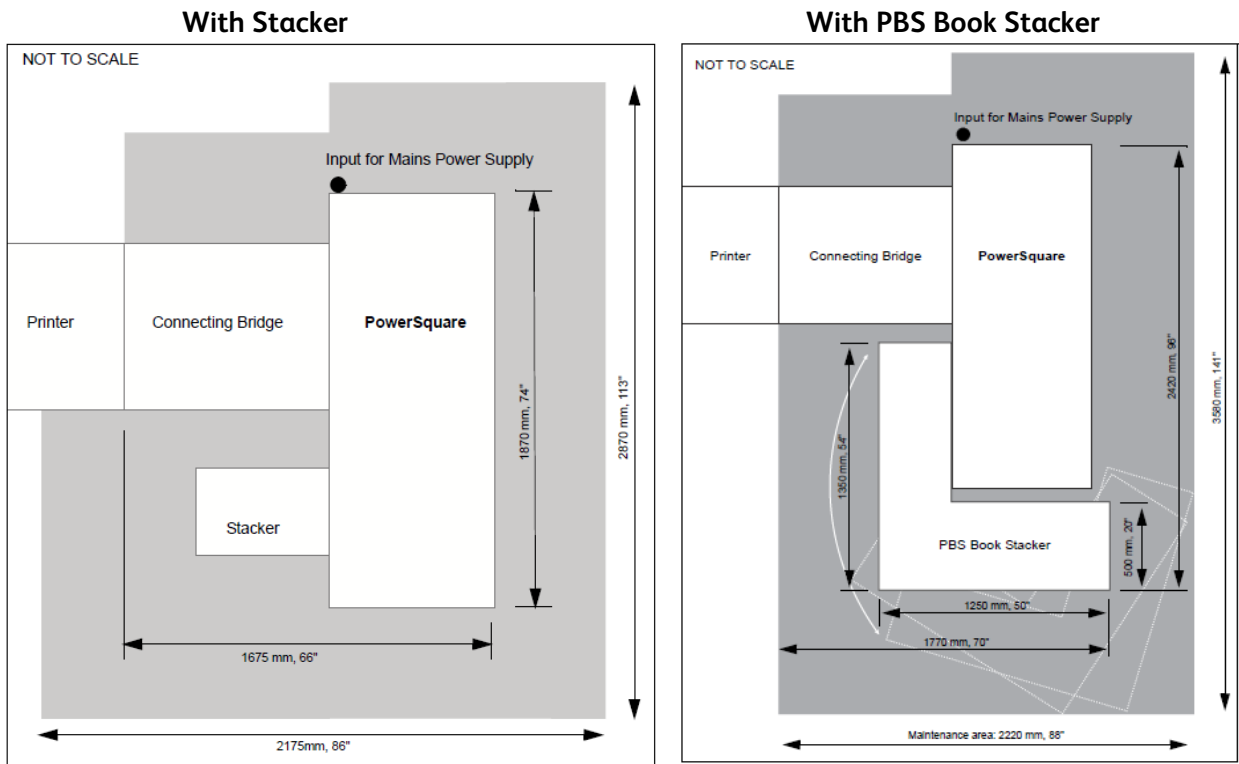

The space requirements illustration provides the machine footprint as well as the overall operating and maintenance area. In addition to the diagram, there should be a minimum of 78 inches (1,981mm) clearance from the floor to the nearest overhead obstruction.

NOTE

The diagrams above are representations only and not drawn to scale.

Space Requirements, continued...

NOTE
The diagrams above are representations only and not drawn to scale.

Machine Dimensions and Weight

Machine	Width	Depth	Height	Weight
PowerSquare 224 with Stacker and Connecting Bridge	66" (1675 mm)	74" (1870 mm)	52" (1330 mm)	1190 lb. (540 kg)*
PowerSquare 224 with PowerSquare Book Stacker and Connecting Bridge	70" (1770 mm)	96" (2420 mm)	52" (1330 mm)	1520 lb. (690 kg)*
PowerSquare 224 with Full Bleed Trimmer and Connecting Bridge	75" (1890 mm)	74" (1870 mm)	52" (1330 mm)	1850 lb. (840 kg)*
PowerSquare 224 with Full Bleed Trimmer, PowerSquare Book Stacker and Connecting Bridge	67" (1700 mm)	96" (2430 mm)	52" (1330 mm)	2180 lb. (990 kg)*

* includes stitch wire

Shipping Dimensions and Weight

Device	Length	Width	Height	Weight
PowerSquare 224	83" (2090 mm)	37" (940 mm)	59" (1480 mm)	1180 lb. (535 kg)
Connecting Bridge	74" (1880 mm)	30" (750 mm)	24" (590 mm)	210 lb. (95 kg)
Bridge Covers	44" (1120 mm)	36" (900 mm)	54" (1350 mm)	320 lb. (145 kg)
PowerSquare Book Stacker	63" (1590 mm)	43" (1070 mm)	49" (1240 mm)	500 lb. (225 kg)
PowerSquare Full Bleed Trimmer	48" (1200 mm)	40" (1000 mm)	47" (1175 mm)	795 lb. (360 kg)

Electrical Requirements

Device	North America	Europe
PowerSquare 224	200 - 240VAC, 50/60 Hz, 4A Power cord: 8 ft. (2,500 mm)	200 - 240VAC, 50/60 Hz, 4A Power cord: 8 ft. (2,500 mm)
PowerSquare BookStacker	Powered by the PowerSquare 224. A separate power supply is not needed.	
PowerSquare Full Bleed Trimmer	220 – 240VAC, 50/60 Hz, 5A Power cord: 8 ft. (2,500 mm) 190V to 240V Auxiliary transformer kit is required for installations in North America and other low voltage locations (below 225V).	

Nema #6 -15R (North America)
IEC 83 'Shuko' (Europe)
BS1363 (UK)

Environmental Requirements

Device	PowerSquare 224	PowerSquare Book Stacker	PowerSquare Full Bleed Trimmer
Temperature	50 - 95° F (10 - 35°C)		
Humidity	35 – 85 % (Non-condensing)		
Heat Emission	80 btu/hr. (Standby mode) 520 btu/hr. (Operating mode)	15 btu/hr. (Standby mode) 55 btu/hr. (Operating mode)	10 btu/hr. (Standby mode) 210 btu/hr. (Operating mode)
Sound Emission	Standby: 66 dB Running: 87 dB peak	Standby: 60 dB Running: 72 dB peak	Standby: 65 dB Running: 79dB peak
Altitude	0 – 6,500 ft. (0 – 2,000 m) Above Mean Sea Level (AMSL)		

Install and Customer Training

In North America, C.P. Bourg installs the PowerSquare 224 and the estimated installation time is one day. Customer training is also one day.

In Europe, Watkiss Automation installs the PowerSquare 224 and the estimated installation time is one day. Customer training is also one day.

Contact information:

- **North America:** C.P. Bourg Inc. (508) 998-2171
- **Europe:** Watkiss Automation Ltd. +44 (0)1767 685700

Operating Supplies

Each PowerSquare 224 is delivered with:

Quantity	Part Number	Part Name
1	812-038	PSQ Stitch Wire Powerbind 0.6mm 15kg
1	952-017	Rule 24"
1	952-436	Air Duster
1	952-435	Digital Caliper 6" (150mm)
2	951-308	LR44 Battery for digital caliper
1	951-095	Kluber Isoflex NBU15 Grease 50G
8	951-710	Alcohol Cleaning Wipe
1	951-884	Disposable Gloves, 2 pairs

The following PowerSquare 224 consumables are not covered by the service contract:

Consumable	Part Number	Approximate Cost
Stitch Heads	WA812031	Contact C.P. Bourg Inc. for pricing.
Clinchers	WA812034	\$1600.00
Trimmer Blades& Anvil Set	WA914132	\$2650.00
Stitcher Wire	WA812038	\$355.00

The following PowerSquare Full Bleed Trimmer consumables are not covered by the service contract:

Consumable	Part Number	Approximate Cost
Trimmer Blades& Anvil Set	WA914594	TBD

Spare parts and supplies can be ordered as follows.

- **North America:** C.P. Bourg Inc. (508) 998-2171
- **Europe:** Watkiss Automation Ltd., Blaydon Rd., Sandy Bedfordshire, SG19 1RZ UK, +44 (0)1767 685700, Attn: Zoe Mortimer

Xerox Nuvera[®] 100/120/144/157 EA Production System and 200/288/314 EA Perfecting Production System

Limitations

- When connected to Nuvera, a Sheet Enhancement Module (SEM) is required.
- On books with more than 40 sheets (160 pages), a self-cover may not produce satisfactory quality and heavier cover stock may be required.
- For the PowerSquare Book Stacker to stack correctly, the spine of the book must be equal to or longer than the book width.
- For FreeFlow Print Server, all finishers downstream of the stacker must be set up at the finisher; the downstream finishers cannot be set up using the print driver.

System Dependencies and Prerequisites

Listed below are the dependencies and prerequisites for installing the PowerSquare 224.

- A Xerox Production Stacker, DS-3500 Stacker, or a BFM-Direct Connect (BFM-DC) is required for inline connectivity to the printer
- If the PowerSquare is inline after a Basic Finisher Module - Direct Connect (BFM-DC), SPAR 9.0.33 is required. This software kit will be shipped with each PowerSquare. Nuvera 9.0.31 machine software is required to enable this SPAR. If 9.0.31 software is not in the machine, order an RV9.0 kit from MAPS. Field upgrades without a Xerox Tape Binder (XTB) or 19.33 Sheet Feed Module (SFM) will require installing additional memory before the upgrade. Nuvera EA requires one 606K16520 kit and one 606K16510 kit. Nuvera 288 requires two 606K16510 kits.
- If the PowerSquare 224 is installed with a PowerSquare Book Stacker or a PowerSquare Full Bleed Trimmer, the following kit is required:
 - 072-335 PBS/P2T Interface Kit for PSQ
- If the PowerSquare 224 is installed with *both* a PowerSquare Book Stacker and a PowerSquare Full Bleed Trimmer, the following kits are recommended:
 - 072-325 Trimmings Conveyor Kit (carries the trimmings from the Full Bleed Trimmer to a waste box in the Book Stacker to enable continuous operation).
 - If the trimmings conveyor kit is not ordered, part 940-180 is required.
 - 072-345 GUI Pivot Arm Kit (moves the user interface to a more convenient location)
- If the PowerSquare Full Bleed Trimmer is installed in North America or other low voltage locations, the following part must be ordered:
 - 072-306 Auxiliary Transformer Kit, 190V to 240V

NOTE

In case the floor at the customer site is very uneven, it is recommended that the Nuvera printer is installed and leveled with a Caster Leveling Kit (Kit number 498K13720).

Configuration Guide

The Configuration Guide contains diagrams of the various Finishing Solutions currently supported.

Xerox[®] iGen3 / iGen4 / iGen150 Press

Limitations

- On books with more than 40 sheets (160 pages), a self-cover may not produce satisfactory quality and heavier cover stock may be required.
- For the PowerSquare Book Stacker to stack correctly, the spine of the book must be equal to or longer than the book width.
- For some substrates and high area coverage, the thickness (before folding) may be reduced to a maximum of 4mm (40 sheets of 80 gsm). On some coated stocks this may be reduced even further.

System Dependencies and Prerequisites

- If the PowerSquare 224 is installed with a PowerSquare Book Stacker or a PowerSquare Full Bleed Trimmer, the following kit is required:
 - 072-335 PBS/P2T Interface Kit for PSQ
- If the PowerSquare 224 is installed with *both* a PowerSquare Book Stacker and a PowerSquare Full Bleed Trimmer, the following kits are recommended:
 - 072-325 Trimmings Conveyor Kit (carries the trimmings from the Full Bleed Trimmer to a waste box in the Book Stacker to enable continuous operation).
 - If the trimmings conveyor kit is not ordered, part 940-180 is required.
 - 072-345 GUI Pivot Arm Kit (moves the user interface to a more convenient location)
- If the PowerSquare Full Bleed Trimmer is installed in North America or other low voltage locations, the following part must be ordered:
 - 072-306 Auxiliary Transformer Kit, 190V to 240V

Xerox® Color 8250 Production Printer

Limitations

- On books with more than 40 sheets (160 pages), a self-cover may not produce satisfactory quality and heavier cover stock may be required.
- For the PowerSquare Book Stacker to stack correctly, the spine of the book must be equal to or longer than the book width.
- For some substrates and high area coverage, the thickness (before folding) may be reduced to a maximum of 4mm (40 sheets of 80 gsm). On some coated stocks this may be reduced even further.

System Dependencies and Prerequisites

- If the PowerSquare 224 is installed with a PowerSquare Book Stacker or a PowerSquare Full Bleed Trimmer, the following kit is required:
 - 072-335 PBS/P2T Interface Kit for PSQ
- If the PowerSquare 224 is installed with *both* a PowerSquare Book Stacker and a PowerSquare Full Bleed Trimmer, the following kits are recommended:
 - 072-325 Trimmings Conveyor Kit (carries the trimmings from the Full Bleed Trimmer to a waste box in the Book Stacker to enable continuous operation).
 - If the trimmings conveyor kit is not ordered, part 940-180 is required.
 - 072-345 GUI Pivot Arm Kit (moves the user interface to a more convenient location)
- If the PowerSquare Full Bleed Trimmer is installed in North America or other low voltage locations, the following part must be ordered:
 - 072-306 Auxiliary Transformer Kit, 190V to 240V

Configuration Guide
