

BOURG BOOK RECEPTION MODULE

The Bourg Book Reception module (BBR) is a recommended accessory for the Bourg perfect binder BB3x02 family except when connected to an In-Line trimmer CMT-130TC or CMT-330TC.

This high-capacity module stacks books vertically on the spine to allow the glue to dry in a perfect position.

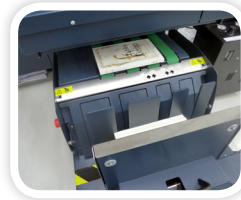

No risk to damage books

Space-saving design with front delivery section

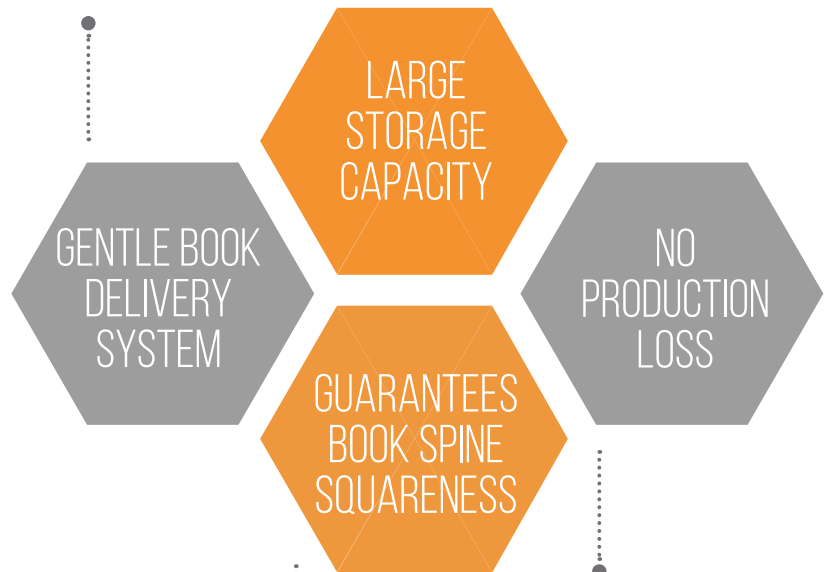

Perfectly compatible with the BB3x02 perfect binder family

- A large quantity of books can be stacked until your operator has time to unload them (700 mm - 27.56 in).

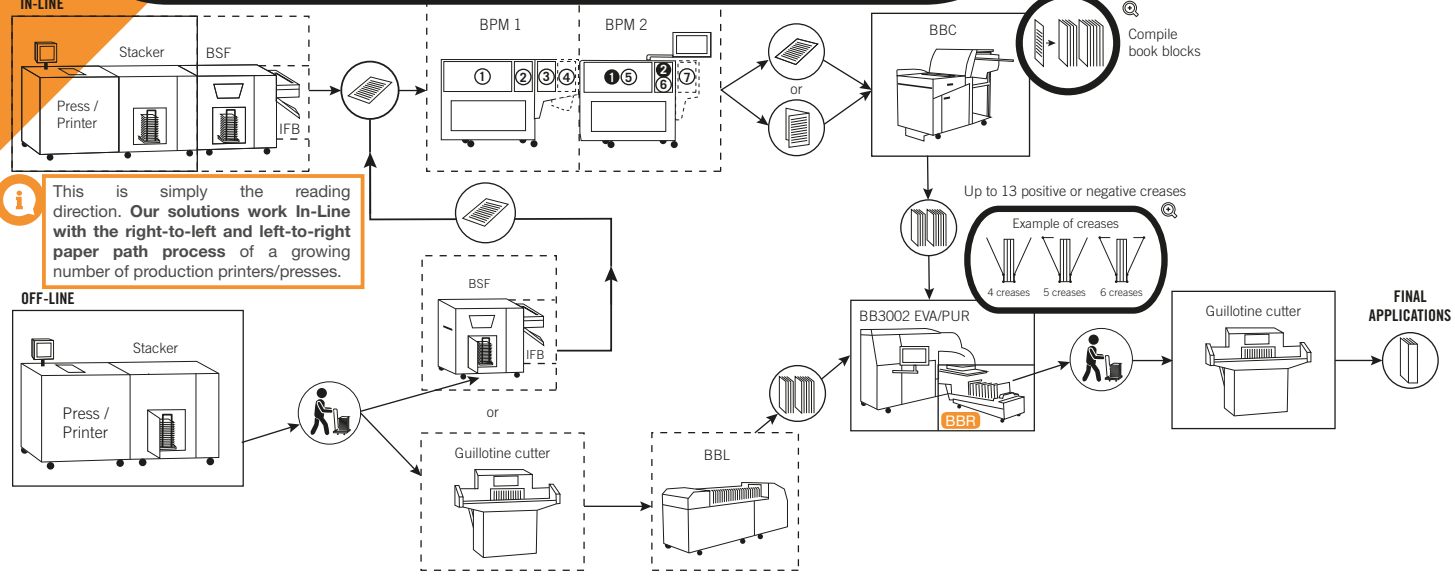

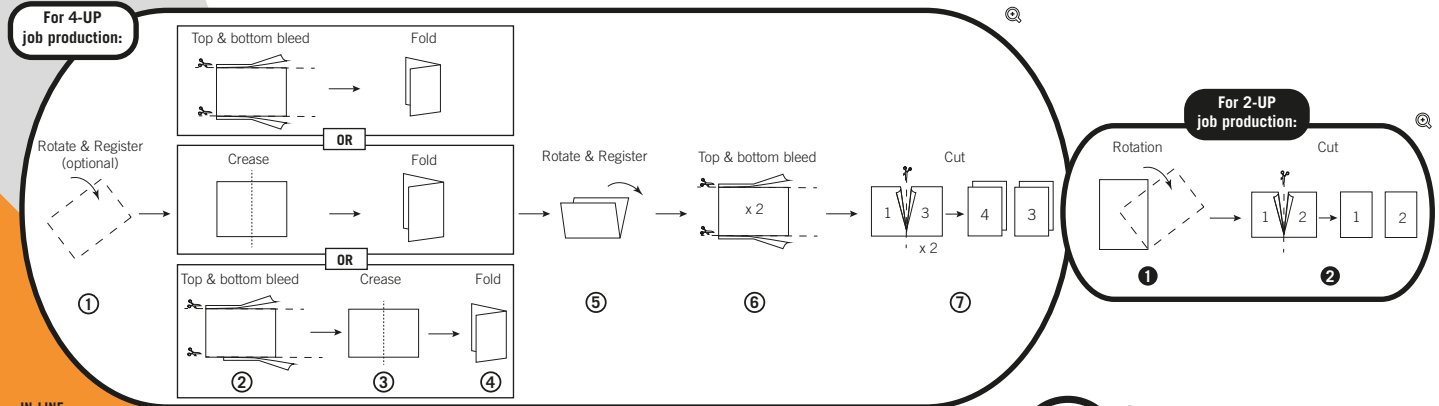

This module delivers books gently to preserve their outstanding quality.

● Contrary to our competitors, books are stacked on the spine. This guarantees book spine squareness.

● No production loss as it can be unloaded during job production.

This is simply the reading direction. Our solutions work In-Line with the right-to-left and left-to-right paper path process of a growing number of production printers/presses.
