

# BOURG SQUARE EDGE

The Square Edge accessory takes traditional stitch-fold-trim booklets and transforms them into square-back booklets. Similar in appearance to perfect bound books, these booklets lie flat, stack easily and allow printing on the spine.

The SQE is connectable with C.P. Bourg high end In-Line, Off-Line, and Dual-Mode booklet making equipment.

Accepts maximum booklet thickness from 1 mm to 6,5 mm (0.04 to 0.26 in)

Take booklet formats of up to 350 x 250 mm (13.77 x 9.84 in)

Maximum speed of 1,750 booklets/hour (single pass) and of 1,150 (double pass)

Booklets can be opened flat without damaging the spine

A good alternative to tape and wire binding systems

Overall bulk is reduced by at least one third

Minimal space requirements of the machine

Connectable to all our booklet makers (BDF-e, BDFN-x, BM-e)

A nice alternative to produce cost-effective photobooks and school books for example: open the booklets flat to fully see all the images and print on the spine.

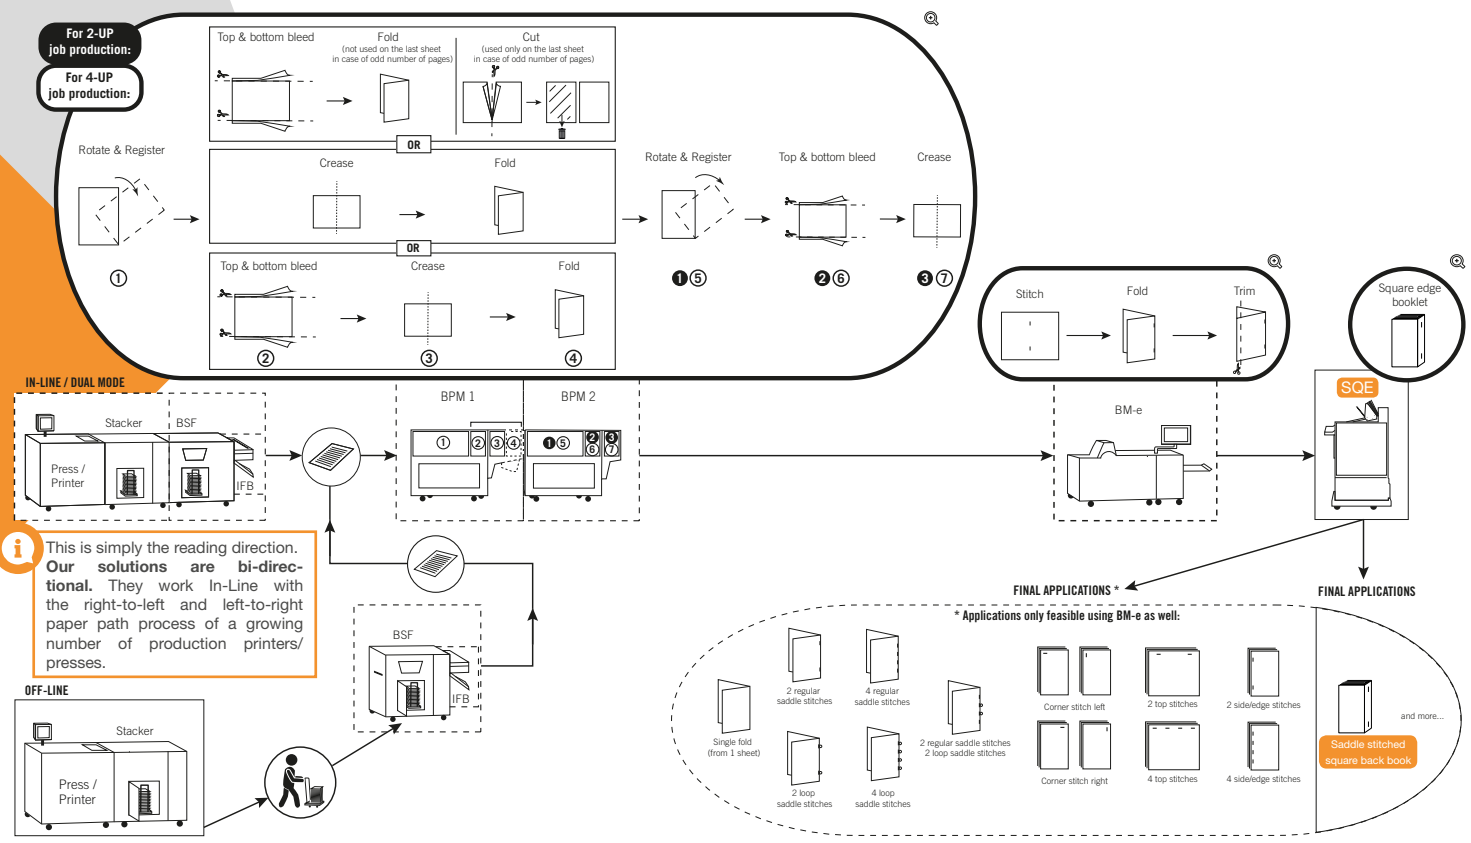

An ideal solution for large publications as they may contain up to 30 sheets (120 pages).

The SQE connects In-Line to all Bourg booklet makers. No additional trimming is required. It may also be used as a stand-alone machine. The choice is yours.

Booklets produced take up little volume: a valuable asset for both storage and delivery of these documents.

**i** This is simply the reading direction. Our solutions are **bi-directional**. They work In-Line with the right-to-left and left-to-right paper path process of a growing number of production printers/presses.

“ This In-Line Bourg booklet making solution (BSF + BCM-e + BM-e + SQE) with our digital press pays for itself within 2.5 years. Everything is more efficient. It takes us less time to get work out of the door and the end results look great. ”

*John DerBoghossian, CEO, Camelot, United States*
